

## :: course evaluations ::

---

**University of Utah**  
**Course and Instructor Evaluation Written Comments Report**  
**Spring 2008**

<b>College/School:</b>	College of Science	<b>Print Date:</b>	15-May-08
<b>Instructor:</b>	EASTON,ROBERT WILLIAM;		
<b>Subject:</b>	Mathematics	<b>Course #:</b>	2210 - 004
		<b>Enrollment:</b>	55
<b>Course:</b>	Calculus III	<b>Evaluations processed:</b>	40

List two things about the course content, materials or design that were effective for your learning, or make constructive suggestions for improvement.

- Suggestions for improvement: Teacher seemed to show no expertise on the subject, for example when faced with a question, they got a deer in the headlights look and poorly answered the question. Also the use of webassign was very frustrating and not helpful for learning the subject. Previous experience with Mastering Chemistry was much better than webassign.
- super amazing teacher.
- The teacher helped to make the material fun and the students actively involved in the material.
- This course really tied up all the calculus courses. The assignments really followed what was on the test and helped me to learn the concepts. Also the lectures were really well put together and thorough. I really enjoyed this class.
- The professor very clearly stated the material in a way that made it applicable and easy to understand. The homework and exams covered what was taught without a lot of surprises. The exam reviews were extremely helpful and the instructor answered all questions.
- Notes in class rather than having to read about everything Would suggest practice test on the first exam like there was on 2nd exam and for the final. Helps ALOT.
- n/a
- Good balance of homework & helpful exam prep

- The book was nice in the fact that it gave good examples. The material wasn't too hard but it made you think about the concepts. The overall course content was pretty good.

EASTON,ROBERT WILLIAM: List two things about this instructor that were effective for your learning, or make constructive suggestions for improvement.

- Professor Easton always had a good attitude in class and encouraged us. He really made me love math again and look forward to going to class and learning something new. I really appreciated his enthusiasm in the classroom. He was also very acomidating for his students.
- One of the better Math professors I've ever had.
- Our instructor did a extremely good job at breaking down complex material into easy to understand peices. His attitude in the class room, as well as his energy, made the class enjoyable and something to be looked forward to.
- Easton did a good job of making sure that he provided plenty of examples to explain the content. He did a good job of making the content pretty clear as well. He was very professional and quite personable. Overall, he was an excellent teacher.
- Easton explained calculus theorems and techniques better than any professor I've ever dealt with.
- Charismatic and funny, made the class interesting. Knowlege of calculus to be able to connect concepts to eachother.
- Professor Easton was a great teacher. He presented course material effectively and was always willing to help us on our homework assignments. One suggestion that I have is to move a little slower through the material covered at the beginning of the semester.
- Helpful, funny, intelligent, and incredibly organized lectures. Despite his neck breaking speed, easy to take notes in his class.
- The instructor was willing to help me with any problems that I had in the class. I was able to use him as a resource for issues that I had with other math classes as well.
- Fast paced lecture style & ability to focus on key issues were great
